

Fitpak presents complete packaging solutions such as high barrier, PA, EVOH based 9 layer films, MAP and vacuum pouches.

Having targeted Fit Packaging Solutions for every product, FITPAK Ambalaj ve Kimya San. Tic. A.S. was founded in 2012. Our facilities are built upon 10.000 m2 land and the

production started in Manisa Organized Industrial Zone in 2014.

#### FITPAK Ambalaj;

Offers complete packaging solutions with high barrier PA/EVOH based 9 layer film line, printing and lamination machines for meat and dairy products, concentrated fruit juice, wine and catering, MAP and vacuum packing etc..

Our product portfolio also include PET based semi rigid thermoformable bottom foil by laminating high barrier film. Easy open, peelable, re-closable, antifoging, lock seal top lidding films with printed and unprinted versions.

Economical pallet cover "Stretch Hood" which nicely covers pallets of products such as raw material, white goods, ceramic, brick, beverages, biscuit. Thanks to its high elasticity. Stretch hood has been included in our portfolio as it suits the conceptual approach of FITPAK.

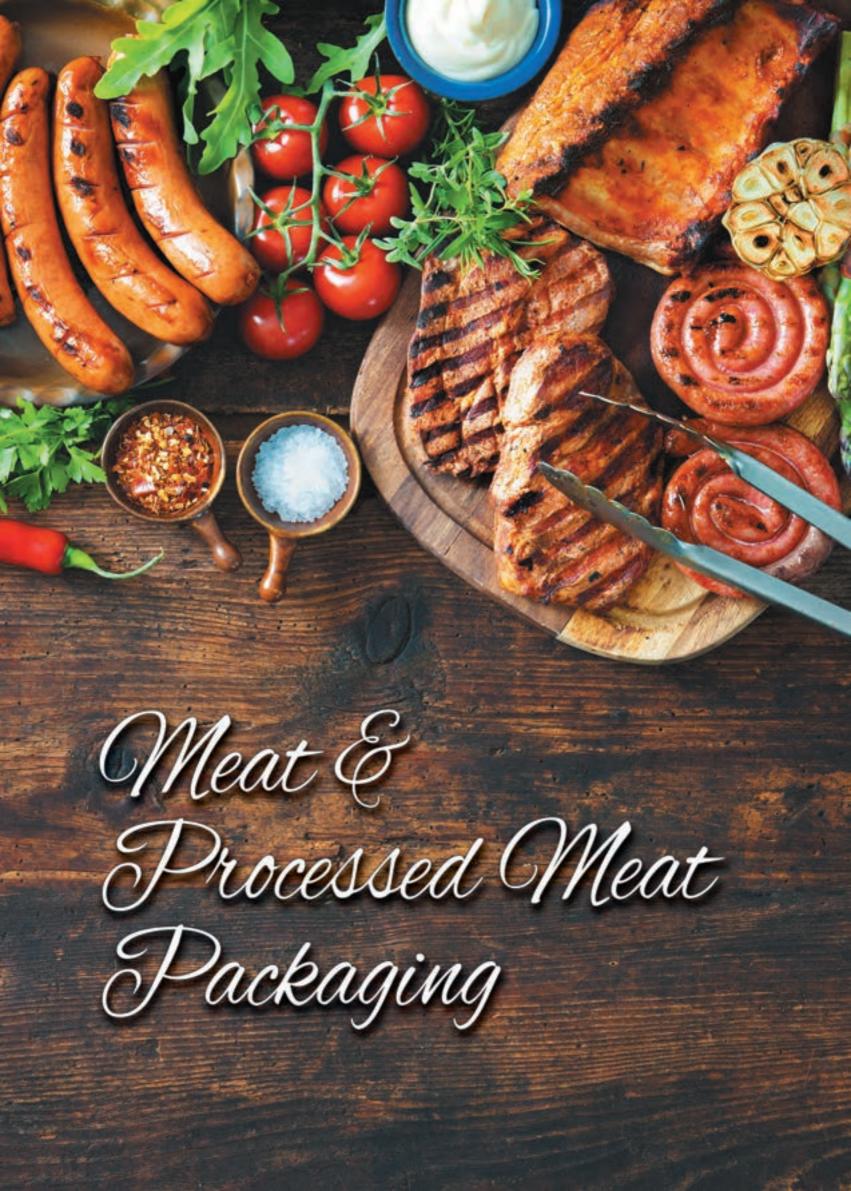

Our machinery site has the state - of - art and highest level of automation. CANIAS ERP software is used to track and control the production, Production is held in an environment in accordance with BRC-IOP hygene and quality.

### Meat & Processed Meat Packaging

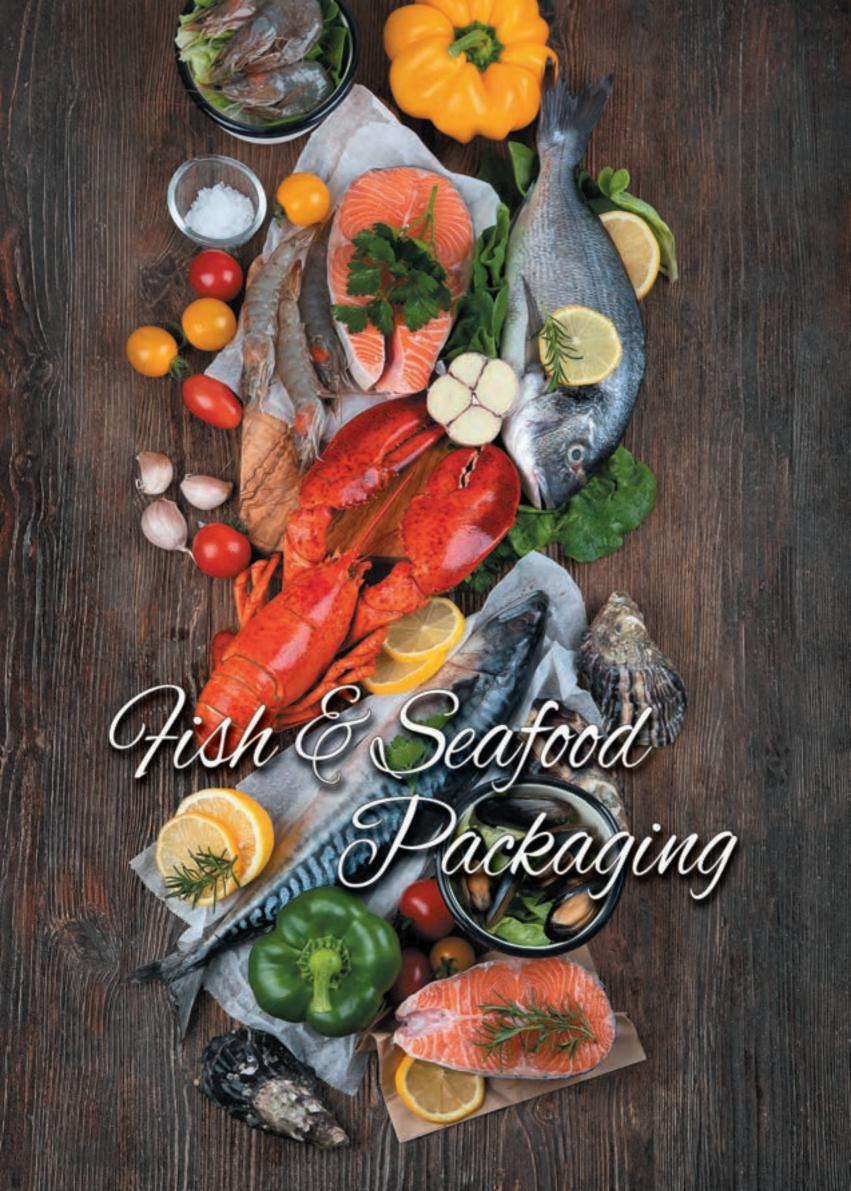

#### Packaging solutions for Meat & Processed Meat Pack;

- UV light barrier
- Excellent genuine Antifogging properties
- Re-closable top lid in room and fridge condition
- Strong Lock-Seal on wet and oily surfaces
- Excellent peel seal properties
- Standard PA / PE, Super High Barrier
- PA/EVOH/ PE structures, thermoformable soft bottom foils

- Peelable lidding films to PE, PP, PS, PVC containers.
- Sterilizable structures
- High Barrier Multi-layer Film laminations with semi-rigid PET, PVC Foils for thermoform applications
- Surface printed or laminated structures with
- HD printing up to 10 colours, partial and matte lacquer applications.

Film Code	Structure	Explanations	Film Code	Structure	Explanations
НВ50	PA/PE	Medium barrier, soft, clear thermoform bottom foil for PE top foil	FP1040W	BOPET/ HB40W	Laminated, high barrier, white top lidding structure for PE containers
НВ60	PE/PP/ PA/EVOH	High barrier, soft, clear thermoform bottom foil for PE top foil	FP1045 FP1045AF	BOPET/ HB45	Laminated, high barrier, clear film for PP containers with or without antifog options
HB90 HB90AF	PA/PE/ EVOH	High barrier, light weight, clear top lidding film for PE containers with or without antifog option	C1010PAF	BOPET	Clear, peelable lidding film for APET, CPET, PS, PVC, Aluminum containers with antifog
FP1040 FP1040AF	BOPET/ HB40	Laminated, high barrier, clear top lidding structure for PE containers with or without antifog options	FP1042P FP1042PAF	BOPET/ HB42P	Laminated, high barrier, easy peel, clear film for PE containers with or without antifog options
FP1040VP	BOPET/ HB40VP	Laminated, high barrier, clear structure for vertical fill and pouch	C1810PAF	BOPET	High barrier, peelable lidding film for APET, CPET, PS, PVC, Aluminum containers with antifog

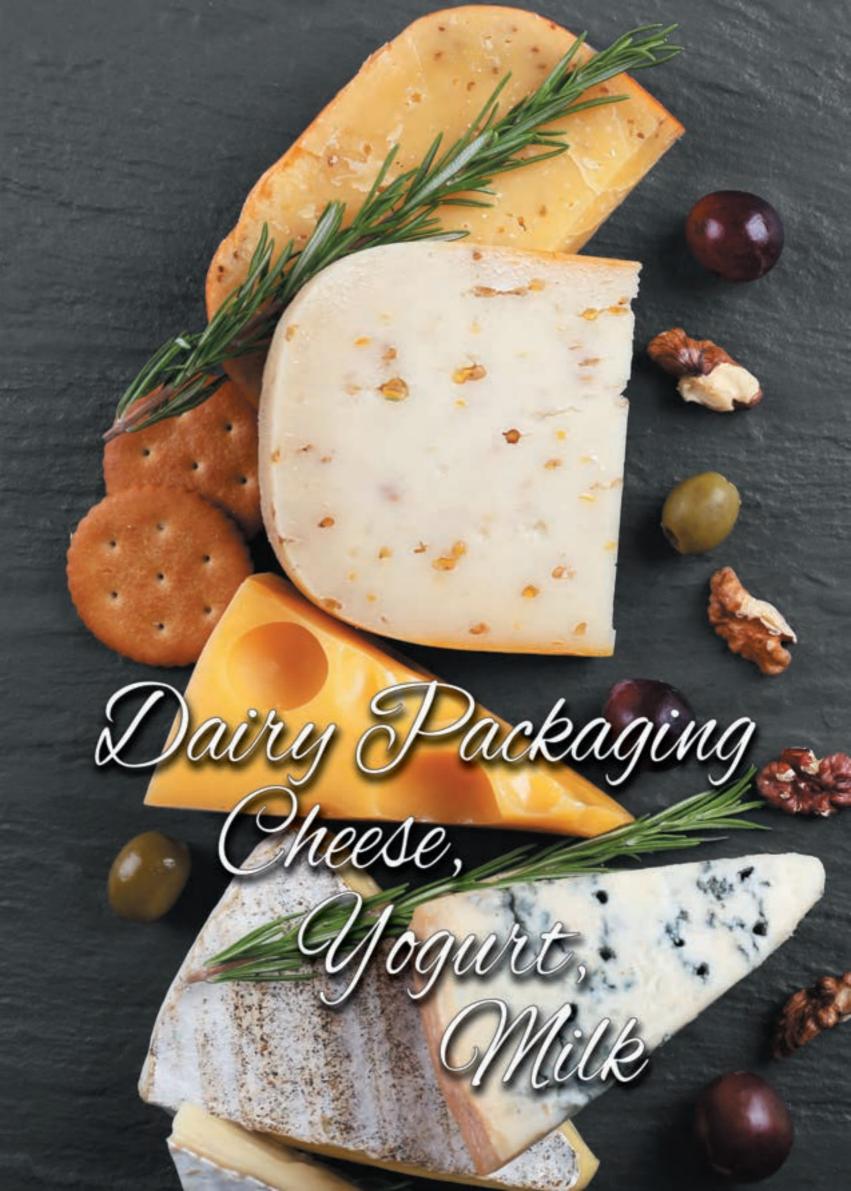

## Fish & Seafood Packaging

- UV light barrier
- High oxygen and moisture barrier
- Strong Lock-Seal on wet and oily surfaces
- Excellent easy peel and seal properties
- Standard PA / PE, Super High Barrier PA / EVOH /
- PE structures, thermoformable soft bottom foils
- High Barrier Multi-layer Film laminations with semi-rigid PET, PVC Foils for thermoform applications
- Transparent, white, blue, black high barrier film and rigid foil alternatives
- Surface printed or laminated structures with HD printing up to 10 colours, partial or full matte lacquer applications.

Film Code	Structure	Explanations	Film Code	Structure	Explanations
НВ50	PA/PE	Medium barrier, soft, clear thermoform bottom foil for PE top foil	FP1040VP	BOPET/ HB40VP	Laminated, high barrier, clear film for vertical fill and pouch
НВ60	PE/PP/ PA/EVOH	High barrier, soft, clear thermoform bottom foil for PE top foil	FP1040VPW	BOPET/ HB40VPW	Laminated, high barrier, white film for vertical fill and pouch
HB90 HB90AF	PA/PE/ EVOH	High barrier, light weight, clear top lidding film for PE containers with or without antifog options	FP1045 FP1045AF	BOPET/ HB45	Laminated high barrier, clear film for PP containers with or without antifog options
FP1040 FP1040AF	BOPET/ HB40	Laminated, high barrier, clear top lidding film for PE containers with or without antifog options	FP1042P FP1042PAF	BOPET/ HB42P	Laminated high barrier, easy peel, clear film for PE containers with or without antifog options
FP1040W	BOPET/ HB40W	Laminated, high barrier, white top lidding film for PE containers	FP1043P	BOPET/ HB43P	Laminated, high barrier, conventional peel, clear film for BOPET, PVC, PS, PP, PE containers with or without antifog options

## Dairy packaging (Cheese, Yogurt, Milk)

#### Packaging Solutions for Dairy;

- Strong Lock-Seal on wet and oily surfaces
- Excellent easy peel and seal properties
- Antifogging
- Re-closable top lid in room and fridge condit
- High barrier soft bottom foil for thermoform applications
- Transparent, white high barrier film and rigid foil alternatives
- High Barrier Multi-layer Film laminations with semi-rigid PET, PVC Foils for thermoform applications
- 10 colours flexo print, partial matte lacquer, haptic lacquer are available for all the product types.
- Films, which are suitable for seal through contamination, produced for milk packaging.
- There are yogurt top foils for the PP, PS containers with the clear and white alternatives.

Film Code	Structure	Explanations	Film Code	Structure	Explanations
FP1040 FP1040AF	BOPET/ HB40	Laminated, high barrier, clear lidding film for PE containers with or without antifog options	FP1011P	BOPET/ PE11P	Laminated, peelable, clear polyethylene film peel to PP, PS, APET
FP1040VP	BOPET/ HB40VP	Laminated, high barrier, clear film for vertical fill and pouch	FP1011PW	BOPET/ PE11PW	Laminated, peelable, white polyethylene film peel to PP, PS, APET
FP1040VPW	BOPET/ HB40VPW	Laminated, high barrier, white lidding film for vertical fill and pouch	FP1012P	BOPET/ PE12P	Laminated, peelable, clear polyethylene film peel to PE
FP1042P FP1042PAF	BOPET/ HB42P	Laminated, high barrier, easy peel, clear lidding film for PE containers with or without antifog options	FP1012PW	BOPET/ PE12PW	Laminated, peelable, white polyethylene film peel to PE
FP1010GS	BOPET/ PE10GS	Laminated, clear polyethylene film suitable for liquid products	НВ50	PA/PE	Medium barrier, soft, clear thermoform bottom foil for PE top foil

# MAP & Processed Meat Packaging

To increase the shelf life of products; oxygen & carbondioxide and nitrogen gas mixtures are adjusted and fed inside the package.

- UV light barrier, the feature providing protection on colours against degradation due to external light.
- Antifogging
- Re-closable top lid in room and fridge condition
- Strong Lock-Seal on wet and oily surfaces
- Peeling ability of the top lid which allows the packaging to be opened easily
- High Barrier Multi-layer Film laminations with semi-rigid PET, PVC Foils for thermoform applications
- Transparent, white, black high barrier film and rigid foil colour alternatives
- Surface printed or laminated structures with HD printing up to 10 colours, partial or full matte lacquer applications.

Film Code	Structure	Explanations	Film Code	Structure	Explanations
FP1040 FP1040AF	BOPET/ HB40	Laminated, high barrier, clear film for PE containers with or without antifog options	TF11	APET/ HB40	Laminated, high barrier, clear, rigid bottom foil. PE sealable
FP1042P FP1042PAF	BOPET/ HB42P	Laminated, high barrier, easy peel, clear film for PE containers with or without antifog options	TF10	APET/ PE10	Laminated, clear, rigid polyethylene bottom film. PE sealable
FP1042PW	BOPET/ HB42PW	Laminated, high barrier, easy peel, white film for PE containers	C1810PAF	BOPET	High barrier, peelable lidding film for APET, CPET, PS, PVC, Aluminum containers with antifog
FP1043P FP1043PAF	BOPET/ HB43P	Laminated, high barrier, conventional peel, clear film for BOPET, PVC, PS, PP, PE containers with or without antifog options			

#### G-Fit Sealable to PET Foil

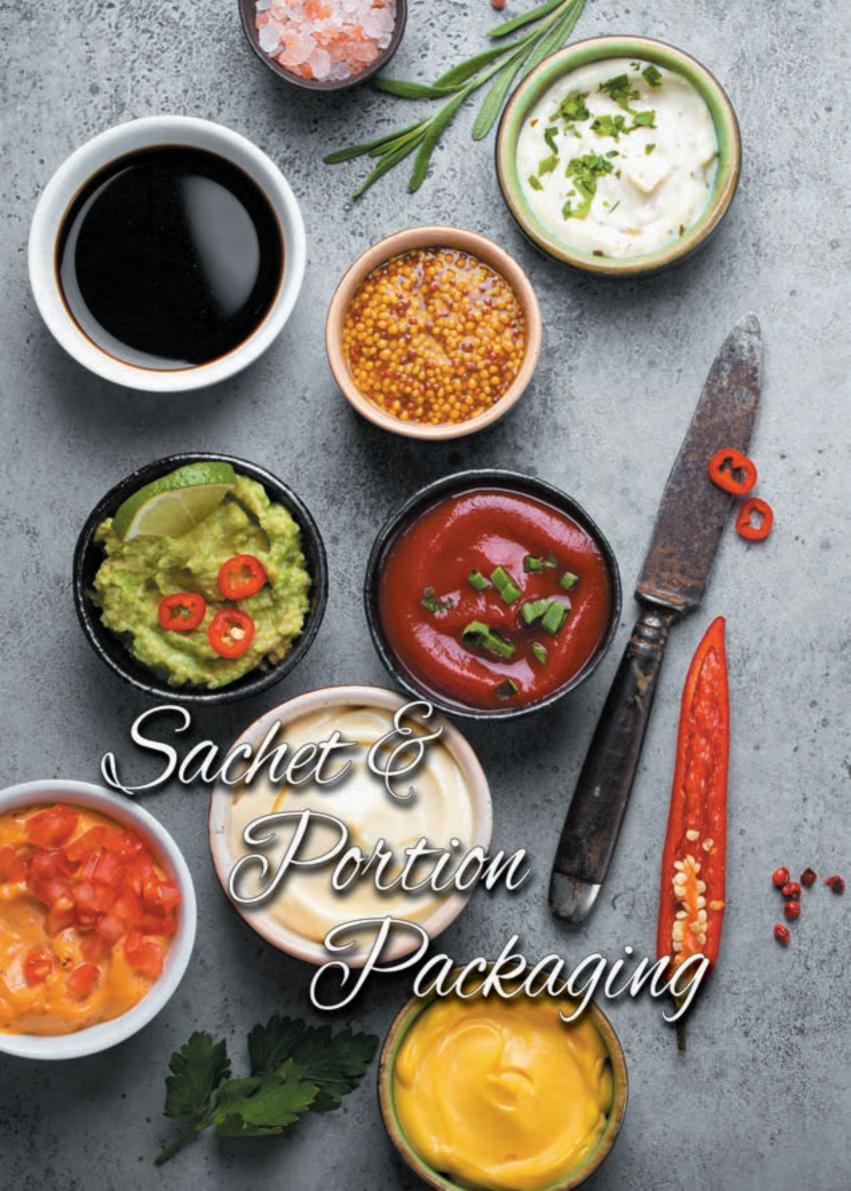

#### Lidding film solutions for MAP & Trays & PET Thermoform Containers;

- Available with low to high barrier options
- Strong Lock-Seal

- Antifog and peelable versions are also available
- High stability and excellent machine performance
- Available thicknesses are 45µ and 65µ

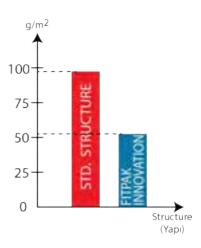

Film Code	Structure	Explanations
FP1014	BOPET / PE14	Laminated, clear film, sealable to PET surfaces.
FP1034	BOPET/HB34	Laminated, high barrier clear film, sealable to PET surfaces.
FP1034P	BOPET / HB34P	Laminated, peelable, high barrier clear film, sealable to PET surfaces.
FP1034AFL	BOPET/HB34AF	Laminated, high barrier clear film with antifog, sealable to PET surfaces.
FP1034PAFL	BOPET/HB34PAFL	Laminated, peelable, high barrier clear film with antifog, sealable to PET surfaces.

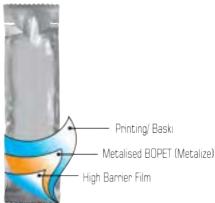

## Sachet & Portion Packaging

#### Packaging Solutions for Ketchup & Mayonnaise Pack;

- High Barrier packaging materials for ketchup, mayonnaise and sauces etc.. products having sensitive shelf life
- BOPET / AL / PE standard structure
- BOPET / PA EVOH PE standard structure -with high barrier foils

- Easy Tearing Properties
- Easy and Clear Cutting
- Excellent packaging machine performances
- Surface printed or laminated structures with HD printing up to 10 colours, partial or full matte lacquer applications.

Structure

**Explanations** 

FP101210GS

BOPET / ALUMINIUM / PE10GS

Laminated structure suitable for ketchup, mayonnaise and sauce packaging

## Vacuum & Stand Up Pouch & Flat Bottom

#### 3 sides sealable, stand up pouch and flat bottom alternatives for different products.

- Transparent, white, blue and metallized colour alternatives
- PA / PE structures
- BOPET / High Barrier Film Structures
- Retort Pouches
- Zipper

- Suitable grades for Pasteurization & Sterilization
- Surface printed or laminated structures with HD printing up to 10 colours, partial or full matte lacquer applications, pouch solutions.

Ürün Kodu	Yарı	Açıklama	Ürün Kodu	<b>Yapı</b>	Açıklama
НВ44	PA / PE	Clear vacuum pouch film	FP1040GS	BOPET/ HB40GS	Laminated, high barrier, clear film for liquid products packaging with or without antifog options
НВ44В	PA / PE	Blue vacuum pouch film	FP1010VP	BOPET/ PE10VP	Laminated polyethylene film suitable for vertical packaging
FP1040VP	BOPET/ HB40VP	Laminated, high barrier, clear film for vertical fill and pouch film	FP1010GS	BOPET/ PE10GS	Laminated polyethylene film suitable for liquid products packaging
FP1020S	BOPET/ HB20S	Medium barrier sterilization pouches	FP1040S	BOPET/ HB40S	High barrier sterilization pouches

### Retort & Microwavable Packaging

We provide retort & microwavable top lidding and standup pouch solutions for ready meal packaging

For retort applications, foods are cooked, sterilized in their packaging during the production step under pressure and high temperature (124,5°C).

Applications: Appetizers and types of cooked meals ete.

- Our customers pack the foods by keeping sterilized thanks to FITPAK films which are intended to retort applications
- Packings highly recommended for sterilization and pasteurization
- Especially produced as BOPET laminated PA/PP.

Film Code	Structure	Explanations
FP1020S FP1020SP	BOPET / HB2OS	Laminated, sterilizable, clear, medium barrier film for PP containers with peelable option
FP1040S FP1040SP	BOPET / HB40S	Laminated, sterilizable, clear, high barrier film for PP containers with peelable option
FP1042P	BOPET / HB42P	Laminated, high barrier, easy peel, clear film for PE containers suitable for pasteurization

## Flexible Packaging

Standard Flexible Packaging structures for Biscuit, Coffee, Retort Packaging, Deepfreeze, Pasteurization and powder food packaging etc..

- BOPET / PE
- BOPP / PE
- BOPP / CPP
- BOPA / CPP
- BOPP / Metalized BOPP
- BOPET / AL / BOPA / CPP retort

- BOPP / Pearlized BOPP standard flexible packaging solutions
- Single or laminated HD printing up to 10 color units, partial or optional full mate lacquer applications.
